Most psittacines (members of the parrot family) are florivores, meaning the main portion of their diet is obtained from plants. Among florivores, there are granivores (birds that eat grain and/or seeds, including nuts), and frugivores (birds with diets based on fruits). Nutritional Requirements for Psittacines (Parrots) By Jeannine Miesle, MA, AFA FOA, CA Levels 1 & 2, PIJAC CAS Member, AFA, AAV Academic researcher in. From what I was taught by some of the top avian veterinarians in the world, a decent diet for the generic Parrot should be about 60% formulated diet, 25% high nutrition vegetables (especially those high in Vitamin A), with the last 15% composed of nuts, seeds, high nutrition fruits, and an occasional treat. The current recommendation by board-certified avian veterinarians who study avian nutrition is that pellets should make up percent of a parrot's diet. Of all of the things you thoughtfully do for your parrot, your first consideration must be for its diet. I can't stress this enough. Without well. Special parrot nutritional needs. Did you know that top issue that malnutrition is the top problem that vets see? Prevent your parrot from getting sick. What We Know About Parrot Nutrition Given the paucity of scientific knowledge about what the actual nutritional requirements of different captive parrot species. 4 Jul - 3 min - Uploaded by BirdTricks Patty Jourgensen explains the ins and outs of the parrot diet.

In order to ensure the health and well-being of your parrot, a varied and nutritionally complete diet must be provided. A diet consisting solely or primarily of seeds.

For most birds in the parrot family (psittacines), we recommend the intellectual stimulation of a varied diet. Not only are different foods enjoyable for birds to taste . the parrot Circus Diet because those parrots lucky enough to have experienced this cavalcade of flavors, textures and colors describe it is as more exciting than .
