

Understanding and solving the pressing environmental problems that face us today requires application of the best scientific knowledge available. Currently most environmental managers are using books that focus on what is known about scientific methods, techniques, models and data that might be helpful. However, as environmental problems become ever more complex, it is questionable to what extent scientific knowledge is adequate or appropriate as a basis for making environmental decisions. Managers need to be aware that scientific results are based on probabilities rather than definitives. This book takes a case-study approach, with contributions from leading names in the field

Polymer/Inorganic Interfaces II: Volume 385 (MRS Proceedings), The boy allies with the great advance : or, Driving the enemy through France and Belgium, Norman Rockwell: Pictures for the American People, 100 idées pour venir en aide aux enfants dysphasiques: Comment leur donner la parole ? Comment favoriser leurs apprentissages en classe et à la maison ? (French Edition), The family memoirs of the Rev. William Stukeley, M.D., and the antiquarian and other correspondence of William Stukeley, Roger & Samuel Gale, etc Volume 1, Hidden Histories: Palestine and the Eastern Mediterranean, MAGICAL GOLF TECHNIQUE, ppk on JavaScript (Voices That Matter),
